ARIA CONVENTION CENTER

ENVIRONMENTALLY CHIC.

Setting a new standard for responsible growth in Las Vegas, ARIA received LEED® Gold certification from the U.S. Green Building Council. To achieve a Gold rating for environmentally sound building design, the property utilizes recycled barn wood and wood from responsibly managed forests, advanced technology to attain a 30% improvement of energy efficiency and innovation to create the world's first fleet of alternative-fuel limousines. From a near smoke-free casino to special parking for hybrid vehicles, ARIA incorporates the best in green thinking. Environmental consciousness is not limited to design, construction and transportation; ARIA received a 5 Keys rating from the Green Key Eco-Rating Program for its ongoing operational commitment to sustainability, an award bestowed on only 1% of the hotels rated.

Imagine being surrounded by natural light, lush foliage and the energy of the sun. The ARIA convention space brings the outside in through a spectacular glass curtain wall spanning the entire north façade of the facility. Specially designed glass balances the benefits of natural sunlight by filtering the desert sunshine integral to a city that boasts over 300 sunny days a year. Beautiful desert plants appear to meander from the pool deck onto the first level meeting rooms creating rooftop gardens that elevate the senses and enhance the meeting experience.
